

Hello,

My name is Neaga Matei, and I am a master's student at the Faculty of Automation and Computer Science, within Politehnica University of Bucharest, specializing in Artificial Intelligence.

I am reaching out in response to the announcement I saw regarding the search for a DevOps engineer responsible for cloud automation. I would like to express my interest in the open position.

I believe that through the experience gained from completing my undergraduate studies at the Politehnica University of Bucharest, specializing in Mechatronics and Robotics, where I delved into subjects such as Artificial Intelligence, Object-Oriented Programming, Cloud Computing, Automated Systems, as well as through numerous in-depth courses and personal projects, I will be a valuable asset to your company. Upon employment, I am confident that I will demonstrate a high level of performance, superior to other employees at my level.

Thank you, and I look forward to receiving further instructions after reviewing the attached resume.

Best regards,

Neaga Matei
